

COVID-19 DISINFECTION DELIVERING A SAFE & SECURE ENVIRONMENT

A PROVEN SOLUTION FOR RESIDENTIAL AND COMMERCIAL PROPERTIES FROM THE EUROPEAN MARKET LEADER IN PROPERTY DAMAGE RESTORATION

For over 60 years we have been protecting the worlds' properties and residents from the effects of fire, water and humidity. This expertise is supported by a unique combination of people, knowledge and technology that has led to the development of industry leading solutions for our clients.

This expertise has now been mobilised to develop and implement a robust SARS-CoV-2 Disinfection portfolio of services as we strive to support our customers in mitigating the spread of the COVID-19 virus.

Drawing on the combined expertise of our Group of 14 countries, we have already implemented this service in both public sector and private sector environments including front line services such as hospitals, as well as airports, aircraft, manufacturing plants and office buildings.

This offer provides disinfection of properties potentially exposed to the virus – enabling organisations to minimise business interruption and homeowners to better protect themselves. Using proven methods from our Group experiences and chemical solutions approved for COVID-19 disinfection, our service provides...

- Minimal business interruption, enabling operations to continue
- Peace of mind for employers, staff and property owners that properties are free from COVID-19 when they return to occupancy
- Proof within hours that a property is virus free*

This offer is supported by a robust methodology designed to best protect our people and mitigate business interruption for our clients, covering key issues including risk management, Personal Protection Equipment (PPE), the use of chemicals, waste management and the protection and training of our people.

To find out more about our rapid and robust response to this crisis please call **01543 686 114** or email uk_sales@polygongroup.com

*testing is carried out by an independent laboratory; result times are dependent on their capacity and availability of testing materials.

We prevent, control and mitigate the effects of water, fire and climate.
